

Save time and money with these datapro \$12 reports

Revised and expanded reports
that include many new systems
and models for 1977

53 objective reports on EDP and
office products to help you make
better planning and buying decisions.

- Determine product performance, without buying, via published users' ratings.
- Identify best price-performing products by direct comparison of specs and costs.
- Control costs by improving the fit of products to your needs.
- Eliminate costly mistakes resulting from improper product selection.
- Outpace competition by increasing awareness of industry trends.
- Identify new or growing markets.
- Cost-optimize EDP functions.
- Save time screening vendors.

unbiased EDP and office product reports: characteristics, prices, users' ratings, comparisons, more.

minicomputers

Whether your interest is in distributed processing, or microprocessors, minis and small business computers per se, you'll find plenty of money-saving information about this fast-changing industry segment in these comprehensive reports.

☐ All About Small Business Computers

This comprehensive report is designed to help you select and apply low-cost business data processing systems. The characteristics and prices of over 200 current systems from over 96 vendors are reported in detailed comparison charts, and the experience of hundreds of small business computer users is analyzed. *Selected from Datapro 70. \$12.*

☐ All About Minicomputers

This comprehensive report is designed to aid you in understanding the rapidly proliferating minicomputers and selecting the one that can best satisfy your requirements. You'll find detailed comparison charts covering the characteristics of over 200 current minicomputers from over 69 manufacturers, as well as users' experiences with thousands of minicomputers. *Selected from Datapro 70. \$12.*

☐ All About Microcomputers

This 32-page report features detailed comparison charts that describe characteristics and pricing of current microcomputers from 67 vendors, plus new information on development systems and kits. *Selected from Datapro Reports on Minicomputers. \$12.*

☐ All About Microprocessors

This completely revised, 18-page report details characteristics of current microprocessors from 27 manufacturers. You'll also find straightforward guidelines to help you understand and apply these compact, low-cost CPU's. *Selected from Datapro Reports on Minicomputers. \$12.*

☐ All About Minicomputer Disk Storage

This 54-page report provides minicomputer users and suppliers with a comprehensive survey of 146 disk storage units. The comparison charts describe the current product lines of 47 suppliers, and the accompanying text offers the reader an enlightening guide for evaluating disk and drum storage performance. *Selected from Datapro Reports on Minicomputers. \$12.*

☐ All About Minicomputer Floppy Disk Storage

have emerged as a distinct type to identify and set of per those report ance are

data communications

These latest evaluations of data communications equipment can help you avoid costly mistakes in planning, installing or updating a system. These 11 valuable reports provide the facts you need to make cost-effective planning and buying decisions.

☐ All About Remote Batch Terminals

The path to high-volume transmission and reception of data at locations remote from your computer center is a confusing one. This 35-page comprehensive report provides detailed specifications of 109 remote batch terminals from 43 vendors, presents the results of an extensive user survey covering more than 1,700 installed terminals, and offers practical guidelines for selecting a batch terminal that will meet your specific needs. *Selected from Datapro 70. \$12.*

☐ All About Data Communications Facilities

This unique 26-page report summarizes the communications facilities and rate structures of AT&T, Western Union, and the currently active microwave and satellite carriers. You'll also find the results of a survey of user experience with about 10,000 communications links, plus guidance in selecting the facilities that will most effectively satisfy your needs. *Selected from Datapro 70. \$12.*

☐ All About Alphanumeric Display Terminals

This comprehensive 54-page report provides detailed specifications of 182 alphanumeric display terminals from 73 vendors, presents the results of an extensive user survey covering more than 14,000 installed terminals, and offers practical guidelines for selecting a display terminal that will meet your specific needs. *Selected from Datapro 70. \$12.*

☐ All About Teleprinter Terminals

This 42-page report provides detailed specifications of 149 teleprinter-style communications terminals from 57 vendors, presents the results of an extensive user survey covering more than 11,000 installed terminals, and provides guidance in selecting the most suitable terminals for your needs. *Selected from Datapro 70. \$12.*

☐ All About Remote Computing Services

This comprehensive 41-page report explains both interactive time-sharing and remote batch processing, discusses their advantages and drawbacks, summarizes the services offered by 100 remote computing companies, tells how users rate the leading companies, and provides guidelines for selecting a suitable supplier and getting started. *Selected from Datapro 70. \$12.*

word processing

Activity in the word processing area continues at a frantic pace, with new product announcements appearing at a rate of one per month. Some 50-odd companies are now actively competing in the market—the overall business climate resembling that of computers in their heyday period of the early sixties. In these reports, you'll find specifications, features, costs, advantages and limitations of hundreds of alternative word processing products. Presented in concise text and extensive comparison charts.

☐ All About Automatic Typing and Text Editing Systems

This comprehensive 50-page survey summarizes the characteristics of over 100 models of automatic typing and text editing systems from 60 vendors. Detailed comparison charts describe each model's basic configuration, pricing, storage medium and capacity, editing features, printer characteristics and much more. *Selected from Datapro Reports on Office Systems. \$12.*

☐ All About Dictation Equipment & Systems

The applications and use of dictation equipment in today's WP environment are discussed in this over 45-page Datapro report, and the features of over 100 central, desktop and portable dictation units are tabulated. *Selected from Datapro Reports on Office Systems. \$12.*

☐ All About Office Electric Typewriters

Although automatic typewriters and text editors are making inroads into the office environment, electric typewriters are still the backbone of any office operation. New entries in the single element, Selectric-type segment of the \$500-million-per-year market make it a good time to review your present typing equipment needs. Thirty-three models from 11 manufacturers are examined and compared. *Selected from Datapro Reports on Office Systems. \$12.*

Analyses of Selected Word Processing Systems

You can save hundreds of hours of investigation with these objective, in-depth word processing system analyses. Each report describes the different systems in detail, including

office copiers

Copier usage continues to spiral, and with it, copying costs. These unbiased reports will give you the facts and background you need to identify and select the most cost-effective equipment for your needs.

☐ All About 150 Office Copiers

Here's a condensed one-for-one look at over 150 office copier models offered by 30 vendors that make up today's proliferating office copier market. In 50 pages you'll find concise text and extensive comparison charts to explain what's available today, and how it performs. *Selected from Datapro Reports on Office Systems. \$12.*

Analyses of Selected Office Copiers

These three money-saving reports provide detailed analyses of major entries in the plain paper copier market—logically grouped to help you understand your options in the low, intermediate, and high volume areas. Specifications, price-performance measurements, operating characteristics, and much more.

☐ Selected Office Copiers: Low Volume

Detailed analyses of five major copiers intended for users needing 5,000 to 20,000 copies per month. All priced under \$5000. Included are: Cannon NP70, Saxon 1, Sharp SF-720, Toshiba BD-702A and AB Dick Bond 901. 15 pages. *Selected from Datapro Reports on Office Systems. \$12.*

☐ Selected Office Copiers: Intermediate Volume

Detailed analyses of three major copiers selling under \$25,000. Suited for users needing 20,000 to 40,000 copies per month. Included are: IBM Copier II, Savin 750 and Xerox 3100. 15 pages. *Selected from Datapro Reports on Office Systems. \$12.*

☐ Selected Office Copiers: High Volume

Detailed analyses of three major copiers for those needing 40,000 to 60,000 copies per month. Prices start at about \$25,000. Included are: Eastman Kodak Ektaprint Series, IBM Series III, and Xerox 3600. 26 pages. *Selected from Datapro Reports on Office Systems. \$12.*

general-purpose computers

These important reports will keep

Selected from Datapro Reports on Minicomputers. \$12.

☐ All About Minicomputer Printers

Until everyone can walk around with a vest-pocket display link to a computer data base, the printer remains the primary means for retaining information retrieved or generated by the computer. This 58-page survey looks at the products of 87 vendors in the form of comparison charts that detail the characteristics of 252 printers or printer families. It also reflects the progress that printer suppliers have made in solving the continuing problem of delivering increasing performance at decreasing cost. Selected from Datapro Reports on Minicomputers. \$12.

software

In these reports, Datapro can help you determine the performance of proprietary software packages without buying, via published ratings from the largest user survey ever conducted. Make these two popular reports your fingertip guide to software selection.

☐ User Ratings of Proprietary Software

This 22-page report contains the results of Datapro's fourth annual survey of proprietary software users, conducted in cooperation with Datamation. You'll find extensive tables showing how thousands of users rated 250 individual packages, plus financial insights and the 1976 Software Honor Roll. Selected from Datapro 70. \$12.

☐ A Buyer's Guide to Data Base Management Systems

This 32-page report presents useful guidelines to aid you in preparing, evaluating and selecting a data base management system. It compares the key characteristics of major systems and provides an in-depth evaluation of these systems: ADABAS, IDMS, IMS, SYSTEM 2000, and TOTAL. Selected from Datapro 70. \$12.

☐ All About Data Communications Multiplexors

This 25-page report explains the techniques and applications of multiplexing, summarizes the characteristics of 67 current units from 24 vendors, analyzes the experience of multiplexor users, and provides useful selection guidance. Selected from Datapro 70. \$12.

☐ A Buyer's Guide to Data Communications Monitors

This 30-page report contains straightforward guidelines to aid you in evaluating and selecting a data communications monitor, compares the key characteristics of leading systems and provides an in-depth evaluation of these systems: CICS (all five versions), ENVIRON/1, Intercomm, TASK/MASTER, and the Teleprocessing Interface System (WESTI). Selected from Datapro 70. \$12.

☐ All About Communications Processors

This 32-page report analyzes the benefits and drawbacks of the programmed communications processor concept in general; it also describes the front-end environment in detail, reports the experience of 256 users, and in detailed comparison charts summarizes the capabilities of 84 communications processors. Selected from Datapro 70. \$12.

☐ How to Analyze Your Data Communications Needs

This 10-page report explains what data communications can do and how you can put it to work in your organization. You'll find straightforward procedures for determining your communications needs and implementing an effective system to satisfy them. Selected from Datapro 70. \$12.

☐ IBM Synchronous Data Link Control (SDLC)

A six-page presentation of IBM's SDLC line protocol, a de facto standard for data communications. Selected from Datapro Reports on Data Communications. \$12.

communications users can select from an overwhelming variety of modems offered by dozens of independent vendors and by the telephone companies. This in-depth, 48-page report summarizes the characteristics of more than 300 current modems from 43 suppliers, provides useful selection guidance, and includes a unique survey of users' experience with over 15,500 modems. Selected from Datapro 70. \$12.

☐ Word Processing: Selected Stand-Alone Printing Systems.

Here's an in-depth examination of four contenders in this popular WP area: IBM Magnetic Card Typewriter line, Redactron Magnetic Tape Editing Typewriter, Redactron Magnetic Card Editing Typewriter, and Xerox 800 ETS (Electronic Typing System). 23 pages. Selected from Datapro Reports on Office Systems. \$12.

☐ Word Processing: Selected Stand-Alone Video Printing Systems.

Added flexibility is inherent in these three video-based product lines. Detailed analyses of: Lexitron Videotype Text Processors, Vydec 1146, 1200, and 1400, and the Wang Laboratories Word Processor. 19 pages. Selected from Datapro Reports on Office Systems. \$12.

☐ Word Processing: Selected Shared Logic Multi-Terminal Systems.

Large WP users will find a great deal of power and sophistication in these three minicomputer-based systems. Analyzed in-depth are: Daconics Visual Type 5400, ICS Astrocomp, and LCS Compu-Text. 18 pages. Selected from Datapro Reports on Office Systems. \$12.

telephone/voice communications/facsimile Specifications, features, costs and more:

☐ All About Intercom Systems

This 38-page report covers the features and characteristics of over 100 intercom systems designed for office or business environments, supplied by 25 different vendors. Such dedicated systems can increase overall efficiencies by decreasing employee walks to discussion sites and lessening telephone call-back charges, as well as improving information flow within the company. Selected from Datapro Reports on Office Systems. \$12.

(continued on other side)

you up to date, and help you select best-suited EDP equipment, media, and supplies. You'll find hundreds of users' ratings and in-depth product and vendor analyses.

☐ Directory of Suppliers

This 174-page directory contains informative profiles of 850 companies that offer EDP products and services of all types, plus guidelines for interpreting the information and selecting qualified suppliers. You'll find entries describing each company's location, size, executives, financial status, ownership, sales and service organization, and product line. Selected from Datapro 70. Special price: \$15.

☐ User Ratings of General-Purpose Computing Systems

This eight-page report conveys the results of Datapro's 1976 survey of general-purpose computer users. Extensive tables summarize the experience of over 2000 computer system users. The users' ratings pinpoint the strengths and weaknesses of each mainframe manufacturer's equipment, software, and support. Selected from Datapro 70. \$12.

☐ IBM System 370

This 71-page report describes and analyzes all of the System/370 equipment and software, including such recent developments as the 115-2, 125-2, 158-3 and 168-3, and summarizes the results of a survey of 863 System/370 users. Selected from Datapro 70. \$12.

☐ All About EDP Media and Supplies

This 30-page report covers a wide range of products such as disk packs, magnetic tape, punched cards, computer forms, etc. A total of 164 vendors and their product lines are detailed. Also included are tabulations of the responses from 1870 users who rated disk packs, diskettes, magnetic tape, punched cards, printer forms, and printer ribbons. Selected from Datapro 70. \$12.
